

DR. BERNARD I. RASKIN

ADVANCED DERMATOLOGY & COSMETIC CARE

VALENCIA, CALIFORNIA

American Board of Dermatology

American Board of Internal Medicine

WHAT IS UNIQUE ABOUT YOUR TRAINING?

I am a fellow of the American Society for Mohs Surgery and skilled in micrographic surgery, which is unique in its accuracy and skin-cancer cure rates, so I am able to care for patients beyond just their cosmetic woes.

WHAT IS YOUR COSMETIC PHILOSOPHY?

My goal is to give patients the benefit of today's technology and my artistry to achieve results that make them look better in a natural way.

HOW DO YOU ENSURE SAFETY?

We have a joint commission (JCAHO) accredited surgery center. This is the same certification that hospitals have. It's right next to the office and we've incorporated the necessary structural aspects and protocols so we can maintain the highest possible safety standards for our patients.

FACIAL CONTOURING WITH FILLERS

More than just volumizers, fillers can be used off-label to add shape to the face where bones have receded due to natural aging. "We recreate facial contours by injecting fillers along the bone to act as a scaffold for soft tissue to drape over," Dr. Raskin says. "We combine the use of a filler as both a volumizer and a scaffold with the treatment of wrinkles via neurotoxins to create a 'liquid facelift.'" Also exciting are some of Dr. Raskin's off-label uses of fillers to address multiple concerns of his patients. "Some of the more unique areas where we are using fillers, such as the eyelids, temples and earlobes, are providing incredible results."

SUBTLE REJUVENATOR

This 54-year-old patient was concerned with discoloration, fine lines and volume loss. "With one TCA chemical peel, we gave her brighter skin. Dysport smoothed her forehead and frown lines, and Radiesse gave her more youthful facial volume," Dr. Raskin says.

"YOU'RE BORN A WORK OF ART—WE WANT TO KEEP YOU THAT WAY" ABOUT BERNARD I. RASKIN, MD

| Liposuction | |

THE GROUP DERMATOLOGY PRACTICE OF DR. BERNARD I. RASKIN EMPHASIZES PERSONAL CARE AND ATTENTION TO DETAIL. "WHETHER PERFORMING MOHS SURGERY, FRACTIONAL CO₂ LASER RESURFACING OR A ROUTINE CHEMICAL PEEL, WE STRIVE FOR THE ULTIMATE PATIENT CARE, COMFORT AND SATISFACTION WITH NATURALLY-AESTHETIC RESULTS.

WHAT HAVE YOU WRITTEN LATELY?

I have written textbook chapters on CO₂ laser resurfacing and liposuction using micro cannulas.

WHY DO YOU WRITE?

It's fascinating. Even if someone has written about a topic before, new information demands that we reexamine what we know from a current perspective.

HOW IS YOUR NEW OFFICE PATIENT-CENTERED?

It was designed with patients in mind. It's modern, upscale and comfortable. It gives our patients additional space for better privacy and comfort with three separate waiting rooms, larger exam rooms and a skin-care education area with various products for them to learn about. The additional space has also helped us reduce waiting time because we have more rooms in which to offer our laser treatments.
