

ADVANCED DERMATOLOGY  
& COSMETIC CARE  
A MEDICAL GROUP

The team at Advanced Dermatology & Cosmetic Care has been closely following the COVID-19 developments. In light of the recently increased restrictions governing Los Angeles County, we would like to remind you that medical care is, in fact, an “essential” service. Our office continues to be open to meet the needs of our patients, but appointments have been reduced to essential and necessary categories. We are taking precautions to help keep staff and patients safe. Appointment times have been spread out to limit patient interaction with staff and one another. Each patient’s temperature will be taken at the door before entering. Patients will be quickly directed into their room to reduce waiting time in the lobby.

If you feel you need to consult with your provider but are unable to come to the office, please call and our staff will assist with telephone triage during this time. We expect to be offering Telemedicine soon.

We are also extending prescription refills for an additional month for most medications. This applies to current patients only. If you are a current patient and you will be running out of medication soon, please call to request a refill. Our dispensary can mail it to you and most pharmacies are now offering delivery.

We will be conducting surgeries and Mohs on the more “essential categories“. Non-essential categories will be rescheduled to an appointment in the near future. We will be contacting all surgery patients this week to discuss scheduling.

We appreciate your understanding and are here to help. We also want to encourage all patients to follow the social-distancing and stay at home order.
