

ADVANCED DERMATOLOGY
& COSMETIC CARE
A MEDICAL GROUP

Advanced Dermatology & Cosmetic Care is re-opening on May 20 and we have already begun scheduling appointments. In anticipation of re-opening we are informing patients of new protocols in place.

Patients, staff, and anyone entering the office is required to wear a mask. Only the patient will be allowed in the office unless the patient needs assistance. The doors will remain closed at this time.

Cosmetic appointments are available. Our cosmetic product store will remain closed for in-person purchases but it will continue to be available for phone and web orders with free shipping.

Appointment times are being spread out to decrease exposure and to allow for additional time needed to sanitize rooms. Waiting room capacity has been decreased to adhere to social distancing. Therefore, you may be asked to wait in your car if a room is not ready and patients are in the waiting room.

Hand sanitizer is available throughout the practice. We encourage patients to use hand sanitizer upon entering and leaving the practice.

We are requiring staff to notify management if they have a family member that becomes ill.

We encourage any patient feeling sick to schedule a TeleMedicine appointment instead of an in-office visit. TeleMedicine appointments will continue to be available to patients who may feel more comfortable staying home.

Certain procedures and surgeries will require a COVID-19 test.
